"Engineering a Quieter Future"

INVESTOR PRESENTATION
H1 FY2026

www.EnvirotechLtd.com

Safe Harbour

This presentation and accompanying materials (the "**Presentation**") have been prepared by **Envirotech Systems Limited** ("**the Company**") for informational purposes only. The Materials do not constitute an offer, solicitation, or recommendation to buy or sell any securities, nor do they form the basis of any contractual commitment. Any potential offering of the Company's securities will be conducted exclusively through a formal statutory offering document

No Representations or Warranties

While the Company has prepared the Materials using information it deems reliable, no express or implied representations or warranties are made regarding the accuracy, completeness, or fairness of the content. Recipients should not rely solely on the Materials when making decisions, as they may not include all material information. The Company expressly disclaims any liability for errors, omissions, or interpretations derived from this presentation..

Forward-Looking Statements

This Presentation includes forward-looking statements regarding the Company's future performance, profitability, and growth. These statements are subject to risks and uncertainties that could cause actual results to differ materially. Key factors include, but are not limited to Market competition (domestic and international), Economic conditions in India and globally, Ability to scale operations and retain talent, Project execution risks (cost/time overruns), Regulatory and policy changes, Interest rate and macroeconomic fluctuations. The Company does not commit to updating these statements should circumstances change, except as required by law.

Confidentiality & Use

The Materials are confidential and intended solely for the recipient. Unauthorized distribution, reproduction, or reliance on this information is prohibited

Company Overview

Envirotech Systems Limited is a leading acoustic products manufacturing organization specializing in noise measurement and control for industrial and commercial applications. Incorporated in 2007, we have expanded our capabilities to include innovative acoustical product design and manufacturing. With over 150 employees and a network of technical experts, we offer cost-effective solutions for various acoustical challenges in industrial, commercial, architectural, and environmental markets.

Wide applications catering to diverse user industries

Construction

Public Transport
Road & Rail
Networks

Energy & Utilities

Music, Sports &
Public Events

Airports &
Heliports

Fracking, Mining,
Oil & Gas

Demolition

Farming

Refits & Refurbishments

Hospitals
& Schools

Restaurants &
Bars

Indoor Conferences

Products - Acoustic Enclosure

For the reduction of noise made by machines and mechanical units, as a leading supplier of industrial noise control we offer enclosures for all kind of noise sources:

- Gas turbines
- Steam turbines
- Compressors
- Diesel Generator
- Pumps
- Conveyor
- Fin Press Machine
- Air Compressor
- Forging Machine
- CNC Machine
- Scarfing Machine
- Other Noise Generating Industrial Machines

Products - Noise Booth

The noise test booth is a quite room used for check the noise level. The main functionality of a noise control booth is to eliminate the shop floor noise. We offer online & offline noise testing booth to test each & every piece of product.

Area of Application:

- Automotive sector
- Air conditioner manufacturing units
- Refrigeration units
- Fan, motor & Compressors manufacturing units
- Speaker and sound purity testing etc.

Products - Engine Test Room Acoustic

To perform accurate and repeatable testing of the product, manufacturers use Engine test cell that provide controlled acoustical environment for product testing and development.

Generally Acoustic Treatment to engine test cell prevents the flow of excessive noise from engine test chamber to nearby areas in automobile industry.

For accurate designing of Engine Test Cell Acoustics module our acousticians & engineers review the acoustic profile of engines.

Products - Anechoic Chamber

An anechoic chamber (an-echoic or non-echoing) is a room designed to stop reflections of sound waves. They are also insulated from exterior sources of noise.

SEMI ANECHOIC CHAMBER

A room which create free field conditions but above a reflective plane. Above a certain frequency all sound waves that hit the walls or ceiling of the chamber will be absorbed.

This type of chamber normally used in vehicle testing with a rolling road so that the vehicle may be driven.

Products - Noise Barriers

We offer a full design, delivery and installation service, which can also include all necessary structural steelwork. Barriers can be erected by our own, trained personnel or installed by other contractors, end users etc.

Ares of Application:

- Mechanical Plants
- Roads, Metro & Railways
- Airport Boundaries
- Generators, Compressors and Chillers
- Construction
- Oil & Gas
- Refurbishments
- Maintenance Activities
- Outdoor & Indoor Events
- Other Areas like hospital, schools, airports, etc.

Products - Acoustic Louvers & Doors

Acoustic Louver has a sound baffle designed to allow airflow through ventilation openings while reducing the radiation of noise. Typical application for our acoustic louvers used in conjunction with machine and enclosures, sound barrier walls and sound control rooms to allow silenced airflow.

Our Acoustic screens and enclosures solve a wide range of environmental noise pollution problems emanating from mechanical plant and systems including:

- Chillers
- Motors
- Compressors
- Pumps
- Roof top plant rooms

Acoustic Doors:

We offer a range of Fire Retardant / Proof / Check Metal Doors Frames customized and accurate to customer specifications.

Management Commentary

Mr. Manoj Kumar Gupta
Managing Director

1. Capacity Expansion and Infrastructure Growth

To meet rising demand, we have expanded our production capabilities by acquiring a new **88,000 sq. ft. factory**, with plans to further extend it to **100,000 sq. ft.** in compliance with local regulations. The additional capacity became **partially operational in July 2025** and is on track to be **fully operational by January 2026**, ensuring enhanced production scalability.

Capacity expansion lead to increase in Revenues for the half year April to September 2025 by 56.73% and Net Profit after Tax by around 110.81% over same period of last financial year.

While awareness and demand for noise control solutions are growing, the market lacks adequate retail-focused products. Recognizing this gap, our Company is developing innovative solutions to help consumers mitigate noise pollution in their homes.

2. Innovation Through Collaboration

We are proud to announce our partnership with **CKM Taiwan** to develop advanced acoustic insulation products using Perforated Aluminium which has very good sound absorbing properties. This initiative holds significant potential, and we look forward to introducing ground breaking solutions to the market.

Management Commentary

Mr. Manoj Kumar Gupta
Managing Director

3. Leadership Development

To ensure long-term success, we are proactively building a strong second line of management. This transition is essential to handling larger, more complex orders and sustaining our growth trajectory.

4. Our Commitment to Stakeholders

We remain dedicated to creating long-term value for all stakeholders and sincerely appreciate the continued trust and support from our partners, employees, and customers.

As we move forward, we are confident that these strategic initiatives will position us for sustained growth and innovation in the years ahead.

Growth Drivers

- Introducing Soundproof Windows & Doors
- Collaboration with IIT-Delhi to develop new products
- Collaboration with CKM Taiwan
- Introducing B2C Vertical
- Targeting Defence Industry
- Enhancing Capacities & Robust Order book

Catering to Defence Industry

- High demand from defence industry
- High margin segment
- This segment contributed around 30% to revenues in FY 2024
- We expect huge growth from this vertical.
- Providing specialized acoustic solutions like anechoic chambers, soundproof rooms, acoustic enclosures, and RF absorbers to DRDO labs, Hindustan Aeronautics Limited, Bharat Electronics, and Defence Research Institutes across India.
- These projects span key defense and research locations, including Hyderabad, Bangalore, Delhi, and Vishakhapatnam.

Collaboration with IIT-Delhi to Develop Acoustic Solutions Utilizing Waste

Envirotech® Systems Ltd, signed a Memorandum of Understanding (MoU) with the prestigious Indian Institute of Technology, Delhi (IIT-Delhi). This partnership aims to utilize the waste (agricultural, plastic, etc.) to revolutionize the acoustic solutions domain. This initiative not only aims to reduce environmental waste but also promotes sustainable manufacturing practices.

Key Highlights of the Collaboration:

- **Innovative Use of Waste Materials:** The newly developed solution will ensure durability, efficiency, and environmental sustainability.
- **Technology and Research:** IIT-Delhi will provide cutting-edge research and technical support, while Envirotech Systems Ltd will focus on manufacturing and market deployment.
- **Environmental Impact:** Expected to significantly reduce the environmental burden by repurposing the waste into valuable acoustic solutions, contributing to India's sustainability goals.

Collaboration with CKM Taiwan

Collaboration with CKM Taiwan

Envirotech® Systems Ltd, is in advanced stages of exclusive collaboration with CKM Taiwan for Perforated Aluminium which has very good sound absorbing properties. This can be used in various industries for noise absorption.

Introducing B2C Vertical

www.Acousticsnest.com

- High demand for B2C products
- Clients across B2C industries like;
 - Hotels,
 - Residential Buildings,
 - Corporate Buildings,
 - Banquets,
 - Auditoriums,
 - And others. This
- segment contributes around 10% to revenues currently. We
- expect huge growth from this vertical.

The screenshot displays the Acoustic Nest website interface. At the top, there's a navigation bar with the company logo, a search bar, and links for Account, Cart, Wishlist, and Compare. Below this is a secondary navigation bar with a 'BROWSE CATEGORIES' button and links for Home, Shop, Services, About US, Blog, and Contact Us. A phone number +91-9355988601 is also visible. The main content area features a 'Best Selling' section with a large banner for 'Effective way to Improve Sound Quality' and a 'Shop now' button. To the right, there's a grid of product listings under the 'Wall Acoustic' category. Each product listing includes an image, a 'SALE' badge, the product name, and the price (original and discounted).

Product Name	Original Price	Discounted Price
PU Foam T-wedge	₹2,017.50	₹1,345.00
PU Foam Wedge	₹2,017.50	₹1,345.00

PU Foam Turbo	₹3,135.00	₹2,090.00
PU Foam Cadbury	₹3,135.00	₹2,090.00
Glass Wool	₹12,592.50	₹8,393.00

Enhancing Capacities

Unit 1 & 2

Capacity:
21,520 Sq. Ft.

Utilisation:
~90-100%

Located in
Kasna, Greater
Noida

Unit 3

**New Capacity
added:**
100,000Sq. Ft.

**Partially Operational
in July 2025 & fully
operational by Jan
2026**

Located in
Kasna, Greater
Noida

Robust Orderbook

Order book as of
1st November 2025 is of approx.
Rs 20.51 crores

- With new factory partially operational, the company is bidding for single large size orders of Rs 10 crores+
- The Company is in talks with its regular customers for large size orders
- Some large defence orders maybe expected soon.

Status update on New Manufacturing Facility

THANK YOU

Envirotech Systems Ltd.
